KEY INSIGHTS

1.) **Contract Type is the biggest churn driver** : Month-to-month have a **43% churn rate**.

This shows customers want commitment incentives.

2.) **Churn is highest in the first year** : Customers with **0-12 months tenure churn at 48%**. The rate drops steadily to 10% for customers with 49+ months.

Early engagement and onboarding programs could reduce overall churn.

3.) **Payment method correlates with churn risk** : Electronic check is the most used payment method at **33.63%**, and industry data shows it's also linked to higher churn. Automatic payment methods like credit card lower churn because they reduce friction.
